**SPEEDTRUSS™**

# A SMARTER WAY TO BUILD A ROOF

## PRECISION AND SPEED ON-SITE

Roof installation systems don't come any smarter than Pryda SpeedTruss™

Pryda SpeedTruss is a new approach to roof truss installation, enabling builders to work faster, easier, safer and smarter.

Pryda SpeedTruss is like an assembly kit – everything just goes together. Position a truss, swing it out, and screw it down. Job done.

Clever truss assemblies, including pre-installed screw arrangements, reduce installation time by removing temporary fixing.

*“All SpeedTruss™ required was a lightweight battery impact driver. Thanks to the rigidity of the screw, installing trusses before connecting the spacer/trimmer is now much safer and faster than using temporary nails that still need a future connector.” - MTB Builder*

**SAFER. FASTER. SMARTER. EASIER.**
